

D2D Holidays – Product Architecture & Development Document

Technology Stack

Layer	Technology
Frontend	Next.js 15 (App Router)
Styling	Tailwind CSS
Backend APIs	Next.js Server Actions + Route Handlers
Database	PostgreSQL
ORM	Prisma ORM
Authentication	NextAuth/Auth.js
Storage	Cloudinary / AWS S3
Hosting	Vercel
SEO	Next.js Metadata API + Schema.org
PDF Generation	React PDF / Puppeteer
State Management	Zustand
Forms	React Hook Form + Zod
CMS/Admin	Custom Admin Panel

1. Project Vision

D2D Holidays is a modern travel platform inspired by PickYourTrail-style itinerary and quotation systems.

The platform should support:

- Dynamic travel package creation
- Day-wise itinerary generation
- CRM quotation system
- Booking confirmation system
- SEO-friendly destination pages
- Customer enquiry management
- Multi-currency costing
- Dynamic transfer management
- Hotel option management
- PDF quotation generation

- Shareable itinerary links
 - Landing page campaign management
-

2. High Level Architecture

```
Frontend (Next.js)
  ↓
API Layer (Next.js Route Handlers)

```

5. USER SIDE SCREENS

5.1 Dashboard / Home Page

Purpose

Primary landing page for customers.

Header Menu

- Destinations
- Packages
- About Us
- Login

- Contact

Hero Section

Features

- Search destination dropdown
- Search by destination
- Travel dates
- Traveller type
- CTA button

Dashboard Layout

```
-----  
Logo           Destinations Packages About Us  
-----
```

```
[ Search Destination Dropdown ]
```

```
-----  
Recently Visited  
-----
```

```
→ Maldives Cards Scroll Right  
→ Thailand Cards Scroll Right  
→ Bali Cards Scroll Right
```

```
-----  
Reviews Section  
-----
```

```
Customer Reviews Slider
```

UI Requirements

- Sticky header
 - Mobile responsive
 - Smooth horizontal scrolling
 - Large travel banners
 - Lazy loaded images
 - Animated destination cards
-

SEO Requirements

- SEO title
- Meta description
- Dynamic OG image
- Schema.org Travel Package
- Dynamic slug URLs

Example:

```
/destination/maldives  
/package/maldives-luxury-escape
```

5.2 Destination Page

Purpose

Displays all campaigns/packages related to a destination.

Sections

1. Destination Banner
2. Filters
3. Trending Packages
4. Honeymoon Packages
5. Family Packages
6. Reviews
7. FAQs
8. Related Destinations

Filters

- Budget
 - Nights
 - Meal Plan
 - Transfer Type
 - Star Rating
-

5.3 Package / Itinerary Page

Purpose

Main quotation & booking display page.

This page will be reused for:

- Quotation
- Booking confirmation
- Campaign display

URL Structure

/package/maldives-luxury-escape

Sections

1. Hero Banner

- Package title
- Duration
- Destination
- Share button
- Download PDF

2. Day-wise Itinerary

Accordion layout.

Example:

Day 1
Arrival + Speedboat Transfer + Dinner

Day 2
Breakfast + Water Sports + Dolphin Cruise

3. Hotel Options

Each stay should support multiple hotels.

Example:

Stay Type: Water Villa

Option 1

Hotel Name

Map Link

Meal Plan

Option 2

Hotel Name

Map Link

Meal Plan

Meal Plan Support

- BB
- HB
- FB
- AI

4. Transfers Section

Dynamic transfer types.

Supported:

- Speedboat
- Domestic Flight
- Seaplane
- Cab
- SIC Transfer
- Bus
- Ferry
- Internal Flight

5. Activities Section

- Island Tour
 - Snorkeling
 - Safari
 - Temple Tour
-

6. Payment Section

- Total package cost
 - Planning platform fee
 - GST
 - Final amount
-

7. Terms & Conditions

- Cancellation
 - Refund
 - Hotel subject to availability
 - Visa rules
-

Features

- Shareable link
 - Download PDF
 - WhatsApp share
 - Mobile optimized
 - Sticky pricing section
 - Expand/collapse itinerary
-

5.4 Enquiry Flow (PickYourTrail Style)

Purpose

Collect customer travel requirements.

Multi-step Tabs

Step 1 – Destination

Dropdown:

- Maldives
 - Thailand
 - Bali
 - Vietnam
 - Dubai
-

Step 2 – Traveller Type

- Couples
 - Family
 - Friends
 - Solo
-

Step 3 – Duration

- 3N/4D
 - 4N/5D
 - 5N/6D
-

Step 4 – Departure City

Searchable dropdown.

Step 5 – Travel Dates

Calendar picker.

Step 6 – Budget

Slider.

Final Submit

Store lead into CRM.

6. ADMIN SIDE SCREENS

6.1 Admin Dashboard

Widgets

Typography

- Large headings
 - Clean sans-serif font
 - Spacious layouts
-

UX Goals

- Luxury travel feel
 - Minimal clutter
 - Fast navigation
 - Mobile-first experience
 - SEO optimized structure
-

Conclusion

This architecture is designed to support:

- SEO-first travel platform
- CRM-driven quotation workflow
- Dynamic itinerary generation
- Reusable campaign/product system
- Multi-currency international travel business
- Scalable future enhancements

The platform is suitable for both:

1. Customer-facing travel website
2. Internal travel operations CRM
